LUXEMBOURG SELECTION FUND – Alaya Diversified, a sub-fund of LUXEMBOURG SELECTION FUND, class A USD (ISIN: LU1896850333)

Objectives and investment policy

The primary objective of the Subfund is to achieve long-term, risk adjusted capital appreciation by investing its assets in a diversified portfolio of Target Funds pursuing UCITS compliant alternative investment strategies. The investment process integrates a top-down view, bottom-up manager selection and on-going risk-monitoring.

The Subfund may allocate its assets to a diversified portfolio of Target Funds diversified as to their investment styles, timeframes, regions and sectors.

Investors may demand to redeem their units on the fifteenth day (15th) of each month, or if any of such day is not a business day, on the following business day and the last business day of each month.

The income in respect of an accumulation share class is not distributed but is retained in the sub-fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years of investment.

Risk and reward profile

More about this rating

- The rating is based on price volatility over the last five years.
- Past data used in calculating the SRRI may not be a reliable indication of the future returns.
- The rating is not guaranteed to remain unchanged and the categorisation may shift over time.
- The lowest rating does not mean a risk-free investment. The differences between ratings are not based on a simple scale. 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 2 and 3. The rating is not a target and the investment strategy is not managed to the rating. The rating is an absolute indicator of risk.

Why is this fund in Category 3?

The fund invests in target funds with Alternative Strategies. As a result, the fund is subject to additional potential risks alongside the market, credit and liquidity risks. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price.

Further material risks:

- The fund may use derivatives which can reduce investment risks or increase risks (a.o. risk of failure of a counterparty).
- Operational risk/third parties: The administrative tasks for the fund can be delegated to third parties. The fund may invest in third party managed funds. If these are affected by an event, this could have a negative impact on the sub-fund and even cause a financial loss.
- Pronounced fluctuations in price are characteristic of emerging economies. Other characteristics include specific risks such as lower market transparency, regulatory hurdles, illiquidity of markets as well as political and social challenges.
- The fund can invest in less liquid assets that may be difficult to sell in distressed markets.
- Companies working in new areas use processes which could be brand-new. So they may have sudden price variations, or even lose all their value.
